## Experience

### APPLIED INTUITION | PRODUCT DESIGNER

*Mountain View, California | April 2022 - Present*

Designing software solutions used by the world's top OEMs to accelerate their development of autonomous vehicles.

Solo designer for multiple products, with a focus on solutions for vehicle verification and validation and synthetic map creation in the 2D & 3D world.

### RIPCORD | HYBRID PRODUCT DESIGNER & PRODUCT MANAGER

*Hayward, California | June 2021 - April 2022*

Designed market differentiating features for our next generation cloud software used by clients across the US and Asia-Pacific region.

Lead the redevelopment of our design system to ensure better visual consistency across our suite of products.

Reported directly to the Chief Product Officer to manage and develop feature releases through market research, product specification documents, and resource allocation.

### KLEINER PERKINS | DESIGN FELLOW

*June - November 2021*

One of the thirteen design fellows selected from a pool of thousands of applicants in one of the leading venture capital firms focussing primarily on early-stage investments.

### ORBYT | FOUNDING PRODUCT DESIGNER

*San Francisco, California | April 2020 - December 2021*

Orbyt is a start-up that facilitated the development and tracking of authentic professional connections for its users.

Invented the visual interface, product, and brand experience for web, mobile, desktop, and Chrome extension.

Collaborated with a team of six engineers to transform visual mockups and feature ideas into a working product.

### SAMSUNG | VISUAL DESIGN INTERN

*San Francisco, California | June - August 2020*

Selected as the only undergraduate design intern across Samsung USA.

Designed operating system concepts for the upcoming mobile device and presented to headquarters in Korea.

Developed pitch decks and visual interface designs for five future projects, including augmented reality and computer hearing products.
